IN THE CLAIMS:

Please cancel claims 13-24 as being directed to non-elected subject matter. Please cancel claim 3. Please cancel these claims without prejudice or disclaimer to the subject matter contained therein.

Please amend claim 1 as follows:

- 1. (Currently amended) A composition comprising:
- a supercritical extract and a hydroalcoholic extract of turmeric;

wherein said composition comprises effective amounts of the supercritical extract and the hydroalcoholic extract of turmeric so as to effect smoke detoxification in a human.

- 2. (Original) The composition of claim 1, wherein a weight ratio of the hydroalcoholic extract to the supercritical extract includes a weight ratio of about 3.0-6.0 parts hydroalcoholic extract to 1 part supercritical extract.
 - 3. (Canceled)
 - 4. (Original) The composition of claim 1, wherein the supercritical extract of turmeric contains about

43% to 47% of turmerones, and

wherein the hydroalcoholic extract of turmeric contains about 11% to about 15% of curcuminoids.

5. (Previously presented) The composition of claim 1, further comprising

an aqueous extract of green tea.

- 6. (Currently amended) The composition of claim 1, wherein an effective amount of the composition is orally said composition is in the form of an oral dosage to be administered to the human exposed to toxins from smoke.
- 7. (Currently amended) The composition of claim 6, wherein the composition is used comprises effective amounts of the supercritical extract and the hydroalcoholic extract of turmeric to reduce elevated levels of mutagens and fibrinogens in the human exposed to toxins from smoke.
 - 8. (Original) A composition comprising:

supercritical and hydroalcoholic extracts of turmeric and ginger;

supercritical extracts of rosemary, parsley seed, peppermint

and clove;

hydroalcoholic extracts of rosemary, parsley leaf, peppermint, and clove; and

an aqueous extract of green tea,

wherein a composition is made of effective amounts of (I) the supercritical and the hydroalcoholic extracts of turmeric and ginger, (ii) the supercritical extracts of rosemary, parsley seed, peppermint and clove, and (iii) the hydroalcoholic extracts of rosemary, parsley leaf, peppermint, and clove to effect smoke detoxification in a human.

- 9. (Original) The composition of claim 8, wherein a weight ratio of the hydroalcoholic extract to the supercritical extract includes a weight ratio of about 3.0-6.0 parts hydroalcoholic extract to 1 part supercritical extract.
- 10. (Original) The composition of claim 1, wherein a weight ratio of the hydroalcoholic extract to the supercritical extract includes a weight ratio of about 4.4 parts hydroalcoholic extract to 1 part supercritical extract.
- 11. (Original) The composition of claim 8, wherein the composition contains weight ratios of: (i) the hydroalcoholic

rosemary extract to the supercritical rosemary extract from about 1.75:1 to 2.25:1; (ii) the hydroalcoholic parsley leaf extract to the supercritical parsley seed extract from about 1.75:1 to 2.25:1; (iii) the hydroalcoholic ginger extract to the supercritical ginger extract from about 4:1 to 6:1; (iv) the hydroalcoholic peppermint extract to the supercritical peppermint extract from about 1.75:1 to 2.25:1; (v) the hydroalcoholic clove extract to the supercritical clove extract from about 1.75:1 to 2.25:1, and (vi) the extracts of turmeric, rosemary, parsley, ginger, peppermint and clove to the extract of green tea from about 1:1 to 2:1.

12. (Original) The composition of claim 8, wherein the composition contains by weight: (i) from about 45% to 55% of the hydroalcoholic and supercritical turmeric extracts; (ii) from about 1.5% to 2.5% of the supercritical and hydroalcoholic rosemary extracts; (iii) from about 1.5% to 2.5% of the supercritical parsley seed extract and hydroalcoholic parsley leaf extract; (iv) from about 1.5% to 2.5% of the hydroalcoholic and supercritical ginger extracts; (v) from about 1.5% to 2.5% of the supercritical and hydroalcoholic peppermint extracts; (vi) from about 1.5% to 2.5% of the supercritical and hydroalcoholic clove extracts; and (vii) from about 35% to 45% of the aqueous extract of green tea.

13. - 24. (Canceled)
